Program Manager, Energy Transition

ABOUT THE ROLE

C4IR Andhra Pradesh (the WEF - Andhra Pradesh Centre for Energy Transition and Cyber Resilience) was established by the Government of Andhra Pradesh through G.O.Ms.No.59 dated 12 June 2025 as India's first thematic Centre in the World Economic Forum's Centre for the Fourth Industrial Revolution (C4IR) Global Network. Hosted by APTRANSCO, the Centre works with the Forum on energy transition and cyber resilience under a three-year collaboration that began on 1 January 2026.

The Energy Transition wing works with the Forum's Centre for Energy and Materials. Its flagship programme, the Coal-to-Clean Transition Deep Dive, explores how Andhra Pradesh can repurpose and reinvest in its existing coal assets (sites, grid connections, land, equipment and workforce) as about 6 to 8 GW of coal capacity enters its 2030 to 2035 retirement window. It will deliver an insight report with recommendations and one or two coal-site repurposing pilots.

The Program Manager will run the day-to-day delivery of this programme: keeping the workplan on track, coordinating stakeholders and the WEF team, and turning discussions into clear documents and actions. This is a full-time, on-site role in Vijayawada / Amaravati for candidates with up to 3 years of experience. It reports to the Centre Head, C4IR Andhra Pradesh (Joint Managing Director, APTRANSCO), and works closely with the Energy Transition Lead (Chief Engineer, Planning and Power Systems, APTRANSCO).

KEY RESPONSIBILITIES

- Maintain the Deep Dive workplan and action tracker; follow up on actions and flag risks, delays and decisions needed to the Energy Transition Lead and the Centre Head.
- Act as the working-level point of contact between C4IR AP, the WEF team and participating institutions, including state utilities, APERC, government departments, industry, financiers and academia.
- Maintain the stakeholder database and manage invitations, registrations and follow-ups.
- Schedule bilateral consultations with state institutions, circulate the WEF questionnaires, record discussions and summarise findings for the insight report and pilot selection.
- Plan and coordinate the launch, technical workshops (in person, hybrid and online) and roundtables, including agendas, speakers, briefing notes and logistics.
- Prepare minutes after each meeting and event, and track action points to closure.
- Carry out desk research on coal-plant repurposing, renewable integration, storage, grid flexibility and transition financing, including international examples.
- Compile data from utilities and partners, and draft inputs for the insight report and pilot concept notes.
- Prepare presentations, briefing notes and regular status updates for the Centre Head and senior officials.
- Prepare concise content for the C4IR AP website, and keep an organised record of meetings, decisions and outputs.

QUALIFICATIONS AND EXPERIENCE

Essential

- **Education:** Bachelor's degree in Electrical, Energy or Power Engineering, or in Economics, Public Policy or a related field.

- **Experience:** Up to 3 years of work experience in the energy or power sector, consulting, programme or project management, policy research, or a development organisation. Relevant internships may be considered.
- **Domain knowledge:** Working knowledge of India's power sector (generation, transmission, distribution and regulation) and of energy transition themes such as renewable integration, storage and coal-plant retirement.

Desirable

- Master's degree in Energy, Public Policy, Management or a related field.
- Exposure to multilateral or international organisations, or to stakeholder workshops and events.
- Familiarity with power sector data such as capacity, generation and demand.
- Proficiency in Telugu.

HOW TO APPLY

Interested candidates may submit an updated CV and a one-page cover note on their interest and relevant experience. Application details will be notified separately.

Program Manager, Cyber Resilience

ABOUT THE ROLE

C4IR Andhra Pradesh (the WEF - Andhra Pradesh Centre for Energy Transition and Cyber Resilience) was established by the Government of Andhra Pradesh through G.O.Ms.No.59 dated 12 June 2025 as India's first thematic Centre in the World Economic Forum's Centre for the Fourth Industrial Revolution (C4IR) Global Network. Hosted by APTRANSCO, the Centre works with the Forum on energy transition and cyber resilience under a three-year collaboration that began on 1 January 2026.

The Cyber Resilience wing works with the Forum's Centre for Cybersecurity on the cyber resilience of government digital systems and critical infrastructure, including the power sector. Current work includes a pilot application of the WEF Cyber Resilience Index on the Government of Andhra Pradesh E-Procurement Portal, prepared by Andhra Pradesh Technology Services (APTS) and with WEF for evaluation, ahead of a decision on extending it to more departments. Andhra Pradesh also takes part in the WEF Partnership against Cybercrime.

The Program Manager will run the day-to-day delivery of the wing's programme: keeping the workplan on track, coordinating the Index pilot and any scale-up, managing engagement with departments and the WEF team, and turning discussions into clear documents and actions. This is a full-time, on-site role in Vijayawada / Amaravati for candidates with up to 3 years of experience. It reports to the Centre Head, C4IR Andhra Pradesh (Joint Managing Director, APTRANSCO), and works closely with the Cyber Resilience Lead (Chief Engineer, Telecom and IT, APTRANSCO).

KEY RESPONSIBILITIES

- Maintain the wing's workplan and action tracker; follow up on actions and flag risks, delays and decisions needed to the Cyber Resilience Lead and the Centre Head.
- Act as the working-level point of contact between C4IR AP, the WEF team, the ITE&C Department, APTS, and participating departments and utilities; manage meetings, follow-ups and correspondence.
- Coordinate with APTS and WEF on the Cyber Resilience Index pilot findings and the decision on scale-up.
- If the Index is scaled, plan and track assessments across departments (nodal officers, data requests, schedules and submissions) and consolidate the results.
- Support the State's participation in WEF cyber initiatives such as the Partnership against Cybercrime, including briefing notes, inputs and follow-up actions.
- Plan and coordinate workshops, trainings and roundtables, and prepare minutes and track action points to closure.
- Carry out desk research on cyber resilience frameworks, critical infrastructure and OT security, and good practice from other governments.
- Support the definition of Andhra Pradesh-specific cyber problem statements and pilot ideas.
- Prepare presentations, briefing notes and regular status updates for the Centre Head and senior officials, explaining technical findings in plain language.
- Keep an organised record of meetings, decisions, correspondence and outputs.

QUALIFICATIONS AND EXPERIENCE

Essential

- **Education:** Bachelor's degree in Computer Science, Information Technology, Electronics and Communication, or a related field.

- **Experience:** Up to 3 years of work experience in cybersecurity, IT governance or risk, technology consulting, or programme or project management on technology initiatives. Relevant internships may be considered.
- **Domain knowledge:** Working knowledge of cybersecurity concepts, including risk assessment, security standards, incident response and critical infrastructure protection, and awareness of India's cybersecurity guidelines for government and critical sectors.

Desirable

- Master's degree in Cybersecurity, Information Security, Management, Public Policy or a related field.
- An entry-level security certification (for example, ISO/IEC 27001 Lead Auditor or Lead Implementer, CompTIA Security+ or equivalent).
- Exposure to operational technology (OT) or power sector systems.
- Proficiency in Telugu.

HOW TO APPLY

Interested candidates may submit an updated CV and a one-page cover note on their interest and relevant experience. Application details will be notified separately.
