Managing Director

Circular Memo No. MD/SE-QC/EE-QC-4/F. Procurment/ D No 226 /2023, Dated 17.02.2023

Sub: APGENCO- Avoiding procurement of Materials/Services from OEMs/ Proprietary /Single Vendor route to the extent possible and procurement through tenders - reg.

APGENCO has established the Quality Control Wing and it is fully functional since 2017. Further, every year APGENCO is subscribing to ASTM Standards and Indian Standards. With the available standards, Quality Control Wing can draw suitable specifications for many of the materials/items/services which facilitate to go for tendering instead of resorting to procurement from OEM/Proprietary/Single Vendors.

In view of the above, and keeping in view of cost reduction measures, all the Stations Heads and Functional Heads and other purchase executives of APGENCO & APPDCL are hereby instructed to avoid procurement under OEM/Proprietary/Single Vendors to the maximum extent possible. Further, if procurement under OEM/Proprietary/Single Vendors is inevitable, it shall be resorted to in consultation with Quality Control Wing duly recording the valid reasons, preferably at the purchase requisition stage itself.

All the concerned are hereby instructed to put in all efforts to procure the material/services through tenders to the maximum extent possible, so as to get the material/services at a competitive price.

The concerned shall follow these instructions scrupulously.
